Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133).
- Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 03 November 2003.
- 2a) ☐ This action is **FINAL**. 2b) ☒ This action is non-final.

DETAILED ACTION

Election/Restrictions

1. Applicant's election with traverse of Group I, claims 1-11 in the paper filed 11/3/03 is acknowledged. The traversal is on the ground(s) that the examiner has not described a process wherein the product may be made by a different process. It should be noted that it is now realized that the two groups of claims pertain to a product and the method of using same. That said, the inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case, the ground coffee and used grounds product may be used in preparing another food product, for example, using same in a dessert topping (e.g. with chocolate) or as an ingredient added in specialty candies.

The requirement is still deemed proper and is therefore made FINAL.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 5, 6, and 8-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Rizzi et al (U.S. Patent No. 5328709).

Art Unit: 1761

Rizzi et al discloses a composition for preparing brewed coffee comprising ground, roasted coffee and processed coffee grounds wherein of said coffee grounds includes 20 mesh U.S. Standard Sieve Series and wherein said ground, roasted coffee and coffee grounds are present in a ratio of, for example, 10:1 (see all of col. 7). In addition, Rizzi et al discloses using robusta or Arabicas beans (col. 8, lines 1-11), including soluble coffee particles (e.g. Example 1; 1% soluble coffee solids), and wherein said composition has a moisture content which is inherently less than 10% (e.g. col. 7, lines 23-26; "Drying...removes substantially all remaining solvent and water."

3. Claims 1-4 are rejected under 35 U.S.C. 102(b) as being anticipated by Canada 1032825.

Canada 1032825 discloses a composition for preparing a brewed coffee beverage wherein said composition comprises roasted, ground coffee and processed coffee grounds and wherein said processed coffee grounds would inherently possess the lipids required to meet the limitations called for in instant claims 2-4 because there is no defatting step employed for said coffee grounds.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rizzi et al (as discussed above).

The claims further call for the ground coffee and coffee grounds to have a ratio of about 65:1 to about 133:1. Although Rizzi et al suggests the use of a ratio which is lower than this range, it is not see wherein the use of such a higher ratio would provide for a patentable distinction. Clearly, the determination of said ratio would be well within the purview of one having ordinary skill, and, absent a showing of unexpected results, it would have been obvious to one having ordinary skill in the art at the time of the invention to have arrived within said claimed ratio range as a matter of preference depending on the particular taste desired or as a matter of cost or availability of the two ingredients.

5. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Rizzi et al (as set forth in paragraph 2) taken together with either one of Napier or Heusinkveld.

Rizzi et al further discloses packaging the coffee composition (col. 9, lines 1-5). Rizzi et al is silent, however, regarding packaging of same in a water permeable pouch. However, it is notoriously well known to package coffee compositions (to be used for brewing) in water permeable pouches. For example, either one of Napier or Heusinkveld teach same. Therefore, it would have been obvious to one having ordinary skill in the art at the time of the invention to have included said coffee of Rizzi et al in a water-permeable pouch as a notoriously well known art recognized packaging alternative.
